

The SAPFA SPEED RALLY

SEASON FIVE of the SAPFA Speed Rally is getting underway!

Event #1 is taking place at BONA BONA Fly in, Saturday, 6 May, 2023...

The Speed Rally is a super fun, high speed flying event that pits the newer beginner pilots against the elites of the navigational flying world, on level playing field.

The Speed Rally is similar to the Fun Navigation Rally, only that it is done at your aircraft's top speed (a predetermined handicap speed.)

The course is around 140 nm with an average of 10 turning points. 20 minutes before take off, you will receive a Map and Turn Point photo sheets, the map will contain a pre-plotted route with magnetic headings for you to follow.

You then take off at a specific time and will then fly the route attempting accurate navigation around each turn point with the objective to fly the shortest route possible at the best speed possible.

The winner will have the best speed against the declared handicap and most accurate navigation route flown.
