

# AIRSTRIP INFORMATION

## RUNWAY DETAILS:

Airfield coordinates: S 27°01'16" and E 26°13'18"

Area Frequency: 124.8 (AFIS for fly-in 120.2 – call inbound 10/5 NM)

1.3 km Tar Runway

Runway headings: 17/35

Runway 17 is downhill with a slope of 0.02%

Elevation: 4605 ft

Fencing: Airfield is fully fenced and free of animals

Airfield strictly used at own risk

Fuel available by prior arrangement

Standard CAA published unmanned joining procedure applies when unmanned

All helicopters can also be accommodated on the apron, subject to prior arrangements

## GENERAL INFORMATION:

The approaches to both runway ends are obstacle-free, making for easy, uncomplicated approaches to both ends of the runway. Runway lights are not available; therefore, all arrivals and departures are restricted to official daytime operations.

It should be noted that during descent into Bona Bona, reception with Johannesburg is limited at low level. However, there is cellphone reception available to cancel Search and Rescue should you choose not to cancel it while still airborne.

**Parking facilities:** A paved apron with tie-down points is available. In addition, extra parking space can be made available on the grass.

Situated in close proximity to Bona Bona are several diversion airfields available should it be necessary in the event of an emergency. The closest is Klerksdorp (FAKD), located a mere 28 NM NE of the airfield.

Fuel is available on request and with prior arrangement.

- Fly-in guests will be met at the airstrip or helipad and transferred to the lodge (3-minute drive.)
- Please note: Unless it is an organised event, prior arrangements for your arrival must be made.
- Contact the manager on **018 451 1188** or email [info@bonabona.co.za](mailto:info@bonabona.co.za) to request landing permission and provide your ETA.
- No landing fees are charged for guests visiting the lodge.
